

SA-2000 Motion Detector Standalone Security System

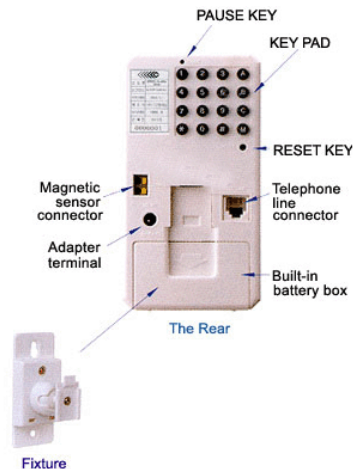

The SA2000 alarm system is a battery powered system which uses both PIR and magnetic (optional) sensors to detect intrusion into a premise. A siren is activated and it will dial 2 preprogrammed numbers to alert the various individuals. It will also activate the microphone in the system and the individuals alerted can hear what is going on at the premise which the alarm has been triggered.

Features

- Low power usage and no additional maintenance cost.
- The PIR is a reliable system which detects both motion and heat from the intruder and small household pets will not trigger off the alarm unnecessarily.
- It is simple to install and use.
- It can be relocated to other locations easily.
- The siren which will be activated after the intrusion will scare the intruder away while the system will dial the 2 preprogrammed numbers to notify the people
